MEMORANDUM

TO: Dr. R. Bowen Loftin  
President

SUBJECT: Recommendation from the Council of Built Environment: Parking Lot Connection between Lots 12 and 38

At its March 8, 2011 meeting, the Council of Built Environment reviewed the attached recommendation from the Design Review Sub-Council on a proposal for Transportation Services to connect lots 12 and 38 as part of the ongoing parking lot rehabilitation project. Lot 38 will be reconstructed this summer and it would be an ideal time to connect the two lots with a drive aisle. This connection would add twelve parking spaces to Lot 38 and eliminate five spaces from Lot 12. The Design Review Sub-Council met on February 23, 2011, reviewed the project, and recommend approval for Transportation Services to connect Lots 12 and 38.

The CBE unanimously approved the Transportation Services project to connect parking Lots 12 and 38 and recommends approval by the President.

Karan L. Watson  
Provost and Executive Vice President for Academic Affairs  
Co-Chair, Council of Built Environment

Rodney P. McClendon

Dr. William T. Stiles, Director  
Veterinary Medicine - Administration

Subject: Request to connect Lot 12 and Lot 38

As part of Transportation Services ongoing parking lot rehabilitation project we will be reconstructing lot 38 this summer. Lot 38 is the 160 space lot in front of the veterinary small animal clinic and is parallel to University Drive. We would like to connect lots 12 and 38 with a drive aisle. This connection would add twelve parking spaces to lot 38 and eliminate five spaces from lot 12.

Transportation Services recognizes the Council’s desire to maintain green space throughout the campus. This connect would have some impact on the campus by removing two post oak trees and a small section of a grassy area. However the connection would benefit visitors and staff members by increasing the entry and exit points of lot 38. Transportation Services Staff met with members from the Veterinary School of Medicine and they are in support of this project. The Vet School Staff revealed to us that it is in their future plans to build across lot 12 so this would be beneficial to correct these entry points before their construction project.

Your favorable consideration of this request is greatly appreciated.
Presentation to CBE
Lot 38 to Lot 12 Connector
Net gain 7 parking spaces

RE: Design Review Sub-Council Report
    Parking Lot Connection between Lots 12 and 38

On February 23, 2011 the Design Review Sub-Council (DRS) reviewed the request from Transportation Services to connect lots 12 and 38 as part of the ongoing parking lot rehabilitation project. Lot 38 will be reconstructed this summer and it would be an ideal time to connect the two lots with a drive aisle. This connection would add twelve parking spaces to lot 38 and eliminate five spaces from lot 12.

The DRS recommends approval.
